

Love, peace and the normal consciousness

The people and consciousness of our time consider normal what comes from knowledge and love. These are the basic characteristics of the creator God who created us. We as humans are created in the image of God, and it is no wonder that God wants to see these qualities and abilities in us as well. So everything that is like God and a healthy mind is like a flower and spreads. What is not acceptable is rejected by consciousness and God. So create something that is pleasing to your soul, your mind, and God.

Love points out the right way to live, the meaning of life. Don't fight. Usually, if you don't respond to such challenges and preach peace, you have no one to fight with. You can only find true peace when there is love.

If you understand that creation is you, you will be able to attract more and more good things to yourself. There are no excuses, the choice of your external environment and your friends is also you. It depends on you what kind of life you have and will have.

You have to be in balance with your spirit world as well. They are your guards. If you do what makes you happy, you will be balanced and you can attract what you have always wanted. To achieve this, you need lots of work. This requires knowledge. You must be prepared for all the bubbles of creation that come to you. You have to work on your desires continuously, non-stop. Your spirit world cannot take your place, the man. As a human creator, with the help of your spirit world, you can create wonderful things in your life, which, if there is no violence from the outside world, is only in your hands.

People's energy is also controlled by energies from infancy to adulthood. But man is consciousness with knowledge (this is energy in the brain, which is also responsible for the different sensations). Human consciousness is capable of thinking, interpreting, and memorizing. You, the birth, are the leader, but as I wrote above, don't think that you are alone. Your spiritual entities are with you and will help you when you need it.

Belong to normal consciousness. Today's modern man is subject to a very rapid development. Those who can follow this and create good living conditions for themselves live fuller, happier and more satisfied lives. Today, this is considered normal. Because of ignorance and the resulting difficulties, people become mentally ill. This is an abnormal state of consciousness. On the other hand, those who are spiritually mature, live a spiritually and consciously ordered life belong to the normal ethnic group.

The standard of the age which everyone follows is considered normal. In the Middle Ages, for example, for the church, the sciences and witchcraft deviated from the norm. Today, the sciences are considered to be the leaders and normally accepted. Today, witches have become healers.

Consciousness encourages people to cultivate the normal. Everything that is accepted and multiplied by human consciousness is considered normal. For example, almost every person buys a car, lives in a house, works somewhere, buys and tries to create something beautiful for themselves using their knowledge. This is considered normal.

In fact, the normal thing is always to get back to your balance. Most of the time, the energies determine your behavior and you are not the person who creates that. Energies are the world of emotions and most of the time they determine your quality. Although it is difficult to overcome the tendencies created by your consciousness and energies, try to look at it from the outsider's eyes. Write down your mistakes – which most of the time don't come from you – and consciously correct them. Get back to normal. Your normal state is where you feel good, you are happy, so you are satisfied with yourself. Those who can control emotions in today's stressful world are considered normal.

I have observed that if I am with a normal mind, knowledge, love, service, integrity, goodwill, kindness, inner peace, scents appear around me, other people become more normal towards me and I can create better living conditions for myself, I see the world differently, consciousness and energies support me in my work to be successful. The Creator and the mind are with me.

You have to know the law of attraction: if you do normal things, it will make you more normal, if you do nice things, it will make you beautiful, if you are with love, love comes to you. It's up to you what kind of creator you are.

Normal consciousness also works in your home if you can build it for yourself: make your home beautiful, read, write, paint, be creative and create beauty. Workplaces are realities created by others, so it is important which workplace you choose for yourself. You have to go to a normal place because it can determine your whole life.

The young age group is forced by school and higher education to belong to an ethnic group with normal knowledge. They are the ones who create the normal workers. The institutions where we study or work all teach disciplined work, which is considered normal.

The question is, what happens to those who cannot maintain a normal state throughout their lives? Are they subject to natural selection? Here I would like to mention mainly the elderly, who no longer study and work as much as they did when they were working. Their consciousness and energies are still the same as when they studied and worked, but they don't use it. These people deteriorate and can also get into a sick state of consciousness. Therefore, it would be worthwhile for the elderly to do creative work and love their family.
