

Positive creation

Every thought, word, action is part of creation. If you are with positive thoughts, words, actions, your energies will understand it and you will be in a positive world where joy, beauty and happiness are part of your world. You are the creator of this world. You attract all good things with these confirming good-natured words and thoughts. It erases fear and unhappiness.

The energies take over your way of thinking, you have to do everything positively. When you do something, you have to say how much you love that action. What a good thing I am doing with this. Love doing everything. Be happy that you can do it.

The bad becomes knowledge and love if you make him so. Be with great love always with everyone. The bad ones can be good, but they didn't learn what they should. You shouldn't think anyone is bad, because it will become bad. The universe must be taught to think positively. Man is an advanced being who can do this.

You shouldn't say that it doesn't work. You should say I'll fix it, it's already working. You must not say that I have a problem, because you attract trouble. You have to say that everything will be fine and it will be fine.

About the energies, your spirit world: they should not be allowed to do anything unless you ask them to. This should become part of the Ten Commandments.

So, positive thinking should be a part of your daily life. You have to cleanse yourself with it every day. Be with love with everyone, because this is the path of healing.

Everyone must be forgiven. Be with love and the one who is with you will become loved.
